

# RANDOX

*Randox Laboratories has over thirty-five years' experience in manufacturing high-quality diagnostic products.*

*Randox Toxicology, a subsidiary of Randox Laboratories, is dedicated to advancing forensic, clinical and workplace toxicology.*

*As the primary manufacturer of Biochip Array Technology and with the world's largest toxicology test menu, Randox Toxicology continuously develop innovative solutions for the fast and accurate detection of over 600 drugs and drug metabolites. Our patented Biochip Array Technology boasts cutting-edge multiplex testing capabilities facilitating the simultaneous detection of up to 42 drugs of abuse from a single sample.*

*Significant re-investment in Research and Development has allowed Randox Toxicology to transform the landscape of drugs of abuse testing, offering the most advanced screening technology on the market.*

*Our versatile range of analysers provide toxicology solutions for both high and low throughput laboratories and are user friendly with little laboratory experience required.*
